stamped envelopes with return card printed

thereon, should be left at the Money Order De-

partment.

On Saturday night only, a through pouch from

Chicago is received on the Fond du Lac train;

and on Monday morning only, a through pouch

is made up and forwarded to Chicago on the 7

o'clock train.

By reading this table carefully, the public can

post themselves thoroughly upon the arrival and

departure of all the mails, and thus avoid much

inconvenience to themselves.

H. A. PATTERSON, P. M.

Terrible Summer in Tunis—132 Degrees

in the Shade.

Mr. George H. Heap, the United States

Consul at Tunis, has forwarded to Professor

Baird, at the Smithsonian Institution, an

interesting letter in regard to the climate

there. The letter says: "Heat of an un-

paralleled intensity has prevailed in this

region since the middle of July. It was

greater a few miles in the interior than in

the city of Tunis or at the seashore. At

Carthage, where a sea breeze prevails from

midday to sunset. To give you some idea

of the temperature, I will state that on the

line of railroad in course of construction

from Tunis westward to Begia, at a dis-

tance of twenty to forty miles from the

sea, the mercury rose almost 72 degrees

Cent. (125.6 degrees Fahrenheit) in the

stone pits occupied by the workmen,

and to 56 degrees Cent. (132.8 de-

grees Fahrenheit) in the wooden ones.

The men could not handle the metals with

their naked hands. It is singular that there

were no cases of heat stroke, which has re-

cently passed over the United States and

caused so much suffering and loss of life.

It would appear that in the heat of 125 de-

grees in the shade is less fatal in its effect

in this region than 96 degrees in the shade

in 106 in the United States. Dur-

ing the period of such temperature the

thermometer in the city of Tunis generally

rose to 110 degrees in the shade, and to

about 100 degrees at the seashore.

An Affecting Sentence.

Judge _____ of the _____ Judicial District

of Arkansas, had brought before him a

convicted felon to be sentenced. The op-

portunity to "improve" the occasion was

not to be lost, and so, after the usual de-

mand for reason why sentence should not

be pronounced, his honor slowly and with

genial feeling addressed the prisoner:

"My poor fellow, you are about to go to

the penitentiary. You are not to be

given up for a long term everything which

the great world values: your family—and

I feel like to take for your associates only

fellow like yourself; your home—and to

take instead what can never have the

semblance of a home; your will—and so be

subject to order of men who have no sym-

pathy with you. Even your ordinary

clothing you will exchange for [here his

honor heaved, and raising his left arm,

pointed to it with the index-finger of the

right hand—] you will exchange for striped

clothes, the stripes running not lengthwise,

these, but so—round as round, like a

coco's tail."—Editor's Drawer, in Har-

per's Magazine for October.

A New Fruit for the United States.

San Francisco Bulletin: Japan has con-

tributed a new and valuable addition to

the list of fruits. It is called the GOMMA,

the persimmon, and a wide popularity is

predicted for it. It is usually as hardy as

the wild persimmon of the Southern States

but differs from it as our choicest apples

differ from the wild crab apple. It ripens

without frost, and has no acrimony when

ripe. The fruit attains a large size, some

specimens weighing over a pound each. It

is of a bright yellow, orange or reddish

color, and in taste somewhat resembles the

plum or fig. It is the best and most popu-

lar fruit of Japan. The tree itself is very

beautiful, with large glossy foliage, and

when set with ripe fruit is a brilliant ob-

ject. It can be successfully grown in the

greater part of this country.

A Heartless Parent.

A party of serenaders halted on Bound-

ary street, the other night, touched the

light guitar, and struck up, with great feel-

ing, "Come where my loves lies dreaming,"

and then a great bush headed, 43

years old, with a beard like a chicken,

leaned out of the window and said, in a

loud, coarse unfeeling manner, "Young

gentlemen, you mistake; she isn't dreaming.

Far from her be it to dream, or even sleep.

She's sitting on the back porch, with her

feet in a tub of claret water, drinking local

monade and fighting mosquitoes with her

palm-leaf fan, and she isn't dressed for

company. Sing something true." But ere

long he ceased to speak, the summer

was still, the front yard was empty, and

the voice of the harp no more awoke the

night in melody.—Burdette.

The President's Liberty to the South

From the Richmond (Va.) Dispatch (Dm.).

For an impulsive and earnest partisan

Mr. Pendleton displayed a surprising de-

gree of calmness and consideration. He

showed in his speech a just estimate of the

great national blessing derived from Mr.

Hayes' patriotism and justice. The thor-

ough re-establishment of State autonomy,

State government, through the boldness

and fidelity of Mr. Hayes, is evidently fully

appreciated by Mr. Pendleton, and we are

glad of it.

Problem on Wheels.

Boston Herald.—It costs twenty cents to

bring a barrel of flour from Chicago to

Boston, and twenty-five cents to take it

from the railroad station to your store or

house. This shows that wicked monop-

opolies do not rob the poor man of all the ad-

vantages of human inventions.

General Grant will perhaps be pleased

to learn that his \$10,000 dinner at South-

erland, the expenses of which the Town

Council vainly tried to fix on the tax-payers,

has resulted in the stables, horses,

cars, &c., of the corporation being levied

on in order to pay the costs of the suit be-

tween the Council and the people.—London

THE GAZETTE.

TUESDAY, SEPTEMBER 17, 1878.

ASSEMBLY CONVENTIONS.

FIRST DISTRICT.

A Republican Convention of the First Assembly District of Rock county, composed of the towns of Avon, Beloit, Clinton, Magnolia, Newark, Plymouth, Spring Valley, Union and the City of Beloit, is hereby called to meet at Footville, on Friday, the 25th day of September, 1878, at 11 o'clock, a. m., for the purpose of nominating a candidate for member of Assembly. The town of Union will be entitled to four delegates; the balance of the towns and the wards of the City of Beloit two each.

Dated this 24th day of September, 1878.

W. H. MCCOTT,
O. C. JOHNSON,
L. S. BOXIE,
Committee.

THIRD DISTRICT.

The Third Assembly District Convention, of Rock County, comprising the towns of Bradford, Clinton, Fulton, Harmony, Johnston, La Prairie, Lima, Milton, Porter, and Turtle, will meet at the Court House, in the city of Janesville, on Thursday, the 26th, of September, at two o'clock p. m., to nominate a candidate for the Assembly, in said district, and transact any other business which may properly come before the Convention. The Convention is called for the purpose of nominating a candidate for the Assembly, in said district, and transacting any other business which may properly come before the Convention.

By Order of Committee.

MILTON.

—We clip the following in regard to Prof. J. D. Bond, who has held his present position since his graduation from Milton College in the class of '72, from a late number of the Daily (St. Paul) Pioneer Press: "Mr. J. D. Bond, Superintendent of penmanship in the public schools of St. Paul, has on exhibition at the State Fair over 1,000 specimens of his pupils' work in writing from the public schools of St. Paul. The average age of the writers of these beautiful pages is 13 years. No more creditable exhibit of public school work has ever been made in this State, and the pupils are entitled to the highest praise."

—Mr. Ward, of the Milton House, who went north last week to attend his daughter's wedding returned on the 10th inst.

—Jackson Vickers from one-eighth of an acre of land and they are very large and fine. The cry that the potato crop is a failure gets a bad set-back by the above yield which is large enough for any year.

—Jas C. Gault, Assistant General Manager of the St. Paul Road, passed through this village Wednesday morning on a special train.

—It became noised about town on Wednesday morning that President Hayes would pass through this village in the afternoon on a special train, and at 2 o'clock a goodly number of ladies and gentlemen assembled at the depot. Upon the arrival of the train the President appeared on the platform of the rear car and shook hands with all who presented themselves. Hon. C. G. Williams introduced Mrs. Hayes, who bowed to the assemblage. As the train moved out three cheers were given and away went the only President that ever honored Milton with his presence.

—Mrs S. J. Stone has our thanks for a mammoth bouquet containing one hundred and sixty varieties of flowers. The bouquet is a very handsome one, and contains many rare varieties all of which Mrs. Stone has for sale.

—The friends of Mrs. F. Newcomb made her a visit last Thursday, in commemoration of her eighty-first birthday. Mrs. Newcomb retains possession of her physical and mental faculties in a remarkable degree, and we trust she may be spared to enjoy many more birthdays.

—Mrs Snyder, of St. Peter, Minnesota, who has been ill for some time, has been cured by the use of Dr. Williams' Pink Pills for Pale People.

—A large drove of cattle passed through this village Friday morning going south. They were in good order.

—An engine was detained here on Wednesday for several hours under peculiar circumstances. Some person had thoroughly saturated the coal in the tender with kerosene and when it was put into the fire the flames rushed out so furiously as to scorch the cab and take the tender out of the engine's springs. The engineer finally left with his train, but was about the maddest "hotshot" puller that ever ran over the St. Paul road.

—Mr. Lane received his new mill stones last week. The pair weigh nearly twenty-five hundred, and ought to grind exceedingly fine.

—Williams & Barden shipped some barley to Milwaukee last Wednesday, and intend to make a business of handling that cereal at this station.

—The Weekly Gazette, at its present low price, should be taken by every family in the county.

—Our base ballers had an opportunity to see the Providence Base Ball club here Friday morning, and the game was represented at the game in Janesville.

—George Pilkington is temporary night operator at Waukesha with a fair prospect of getting the place permanently.

—Mr. Freeborn Hamilton, brother of Messrs. H. G. and E. T. Hamilton, wife and daughter, of Alfred, New York, arrived in town Thursday and are visiting their relatives.

—Agent Tomkins sold fifty excursion tickets to Madison during the fair. So far as we can learn the exhibition gave general satisfaction.

—Mr. L. J. Plumb has just finished a very accurate and handsome wood engraving of the college buildings and campus. For further Green is having an electrotype made of the cut and will use the same in his stationery trade. Mr. Plumb has exhibited decided ability, both as an artist and engraver, hitherto and this last effort is a very creditable one.

—Edwin Babcock, of Minnesota, arrived in town Friday, called here by the last illness of his mother.

—R. Richardson, of the extensive military establishment of Gage Bros & Co., Chicago, was at home Friday. He reports business to be very brisk in his line.

—Miss F. H. Williams is visiting friends in Chicago this week.

—The finance articles of "Hard Money Republican," which have appeared in the Milton Register, would make first class campaign documents. They are eminently reliable.

—Miss Alice Davis, of Davis Junction, Ill., has been visiting Milton relatives and friends.

—Lake P. Babcock died Friday night after a long illness of but a few weeks. The funeral took place at the late residence of the deceased on Saturday afternoon and was quite largely attended. The services were conducted by Rev. E. M. Dunn, assisted by Rev. J. C. Rogers, and the remains were taken to Milton Junction for interment. Mr. Babcock was seventy-three years of age and leaves a wife and six sons and daughters to mourn his departure.

—Mr. Spooner, of Whitewater, has been appointed assessor of the bankrupt estate of H. H. Waters.

—A talented artist from Janesville has opened a shop in the Milton House and is prepared to give you a close shave or a properly hair-cut. If you don't believe it try it once.

—The contract for grading the highway near the residence of J. G. Carr, has been let to Joe Davis, of this village.

—Mr. J. M. Johnson has gone to Ohio to attend the State fair and visit relatives.

—Mr. C. F. Lane, proprietor of the North-

western seed house and apary at Koshkonong, has our thanks for a magnificent bouquet of rare flowers grown by him. Mr. Lane is achieving a merited success in the cultivation of flowers and vegetables, as in producing honey and growing plants and trees.

—Mr. W. S. Alexander, of St. Paul, general freight and passenger agent of the St. Paul and Pacific Railroad, was in town Sunday visiting his parents. He was accompanied by his wife.

—Mr. J. A. Crandall, of New York, who has been acting as general agent for Thomas & Magner in introducing their empire cross-spring, has returned to the east, and Mr. S. S. Crandall, late of Marquette, Illinois, fills the position as State agent with headquarters here. Messrs Thomas & Magner now have their shops here in running order.

—Mr. M. S. Shaw, of Alfred, New York, is in town visiting friends.

—On Sunday evening a joint meeting of the society of citizens and citizens generally, was convened at the Seventh-day Baptist church for the purpose of raising funds for the yellow fever victims. The meeting was under the auspices of the Christian Association of Milton College.

After music by the choir, Rev. L. T. Leominis presided over the object of the meeting and Rev. Wm. Walker offered prayer. The choir then rendered another selection after which Rev. Mr. Loomis read appropriate passages of scripture and gave a brief statement as to the deplorable condition of the people in the fever stricken cities of the South, and their need of assistance. Brief remarks were then made by

Reverends E. M. Dunn and William Walker and Mr. Rood, after which the collection boxes were passed and forty dollars contributed.

Mr. D. C. Burdick suggested that the amount be increased to fifty dollars and that it be given out of the amount, whereupon Mr. J. A. Crandall, of New York, contributed a quarter of the twenty and Messrs. Lee, Sowle and Clarke the balance. The boxes were again passed and enough secured to make the whole amount sixty-nine dollars. Messrs. P. M. Green, W. W. Clarke, W. W. Dunn, B. T. Thirteenth, R. T. Greenman, Rev. William Walker and Henry Bowers were appointed a committee to secure donations. The meeting then adjourned for one week to meet at the same time and place, the audience being dismissed with prayer by Rev. E. M. Dunn. Notice was given that a meeting of the ladies will be held on Tuesday afternoon to make arrangements for sending bedding and clothing to the destitute in the South.

—We hope that those who have not contributed to the above object will hand a subscription to some member of the Soliciting Committee prior to Sunday evening. Small amounts thankfully received, larger ones also.

—The Recorder admits a dirty attack on one of its party friends to its columns, because that individual has refused to support the cowardly writer in question and coupled with the fact that the attacked party is supposed to be a correspondent of the Chicago Times. Then the Recorder copies in its issue of the 10th inst. an item in regard to the reunion of the 13th Regiment, taken bodily and without credit from the Times, and written by the individual in question. We think it fully as creditable for a Republican to correspond for a Democratic paper as it is for a Republican paper to appropriate matter from a Democratic sheet without giving the latter due credit.

—If you want the best paper for the least money, subscribe for the Weekly Gazette and you'll get it.

—The Other Arm.

Oil City Derrick: "I know where there is another arm just as pretty as this one," said a young Old Citizen to his sweetheart, as he pinched her fair arm yesterday evening. The storm that quickly gathered upon the lady's brow as quickly passed away when the young man pinched her other arm and said, "It is this one, dear."

MISCELLANEOUS.

VEGETINE

Vegetine Purifies the Blood and Gives Strength.

DE QUON, Ill., Jan. 21, 1877.

Dear Sir, Your "Vegetine" has been doing wonders for me. Have been having the Chills and Fever, caused by the use of quinine, and nothing giving me relief until I began the use of your "Vegetine". It has cured me, and I am now in perfect health, and I am satisfied that if families that live in the age of disease, and that are afflicted with the Chills and Fever, that prevail at certain times of the year, save their money, and live to a good old age, they should use your "Vegetine".

J. E. MITCHELL.

Agent Henderson's Looms, St. Louis, Mo.

All Diseases of the Blood. If Vegetine will relieve pain, cleanse, purify, and cure such diseases, restoring the patient to perfect health, after trying all other remedies, and I am suffering for years, it is not conclusive proof, if you are a sufferer, you can be cured? Why is this medicine performing such great cures? It works in the blood, in the circulating fluid, it can truly be called the Great Blood Purifier. The great source of disease originates in the blood, and no medicine that does not act directly upon it, to purify and renovate, has any just claim upon public attention.

VEGETINE

Has Entirely Cured Me of Vertigo.

MR. H. R. STEVENS.—CAIRO, Ill., Jan. 23, 1878.

Dear Sir, I have used several bottles of "Vegetine"; it has entirely cured me of Vertigo. I have also used it for Kidney complaint. It is the best medicine for kidney complaint. I would recommend it as a good blood purifier.

PAIN AND DISEASE. Can we expect to enjoy good health when bad or corrupt humors circulate with the blood, causing pain and disease, and these humors, being deposited through the entire body, produce pimples, eruptions, ulcers, indigestion, headache, rheumatism, and numerous other complaints? Remove the cause by taking VEGETINE, the most reliable remedy for cleansing and purifying the blood.

VEGETINE

I Believe it to be a Good Medicine.

DR. STEVENS.—XENIA, O., March 1, 1877.

Dear Sir, I wish to inform you that your "Vegetine" has done for me. I have been afflicted with neuralgia, and at times three or four of the Vegetine was entirely relieved. I also found my general health much improved. I believe it to be a good medicine. Yours truly, FRED HARVEY, ESTICK.

VEGETINE

Druggist's Report.

MR. H. R. STEVENS.—

Dear Sir, We have been selling your "Vegetine" for the past eighteen months, and we take pleasure in stating that it is every case to our knowledge, it has given relief.

Respectfully, BUCK & COWELL, Druggists, Hickman, Ky.

BRIEFLETS.

—Wet a work to get water works.
—J. Frost has gone North on a short trip.

—There is plenty of dust in the real-estate market.

—Nothing is now booked for the Opera House until November.

—There are very few who cry "ty" at money. They take what they can get.

—The doctors are doing a driving business, but the mortality is less than any previous year at this time.

—Skiff and Gaylord have cancelled their engagement of the Opera House and will not visit Janesville this fall.

—The commercial colleges are at it again. Slusher's opened Monday, and Fellows & King commenced to-day.

—Hess Opera Troupe have spoken for the Opera House for one night in January 1879. Emma Abbott and other notables will be with them.

—We call the special attention of our readers to McKee & Bro's carpet announcement in another column. Everybody should read it.

—Next Saturday night there will be an attempt made to solve the financial problems at the Young Men's Christian Association, Sutherland and Smith taking one side and Hyzer and Brooks the other.

—On the afternoon of September 11th, Mrs. Thomas Graham, of the Graham house, lost her pocket book containing \$32 in money. Fortunately it was found by an honest man, James Moust, of the first ward, who safely returned it to the owner.

—The son of Charles C. Mongel, Sr., of Louisville, Kentucky, has arrived from the yellow fever district to escape death. He is the guest of the Hon. Wm. Pomeroy, of this city. His presence here is welcomed by all the tobacco growing farmers.

—The people of Janesville, Beloit, Whitewater, Monroe, and surrounding country, will now have an opportunity to obtain the pen, as F. D. Pooler, the agent, is here—headquarters with H. H. Blanchard Esq. He will call personally, upon the professional and other business men generally.

—To-morrow is the day appointed for the reunion of the Thirtieth Wisconsin Wisconsin Veterans. Their headquarters are to be at Apollo hall, and the camp-fire is to be lighted at Pope's spring. The lotos will start for the grounds at 10 o'clock, a. m., and will make frequent trips thither during the day.

—Wyle's sidewalk was blocked up again to-day with another big shipment of Best's bottled beer. There must be a host of invalids judging from the way folks rush after this for a tonic. They all say they are getting well fast, and are getting their waitbands let out. If Wyle don't look out he will break up the business of the doctors.

—Dimock & Hayner have just been appointed agents for the Old Royal Insurance Company, one of the solid institutions of old England. This, together with the strong line of sound old companies heretofore represented by this firm, comprises the list of the very best and safest insurance companies in America and England. They write good risks at the lowest rates.

—McKee & Bro. are in receipt of the first invoice of their fall stock of goods, the purchase of Edward McKee who is now in the Eastern markets. They have already received large lines of millinery and choice selections of fashionable dress goods, and in the course of the next two days they will open the largest and most attractive stock of new fall goods north west of Chicago.

—The Institute for the Blind commences upon another year to-morrow. Twenty-five pupils have already arrived and to-morrow doubtless will see the rest in their places. Mrs. Little has been greatly refreshed and reinvigorated by her summer's rest, and enters upon her work enthusiastically. Her assistants are also at their posts, rested and ready, and the year promises to be a more successful one even than those which have preceded.

—The readers of the Gazette will remember doubtless the account given last spring of a sad love disappointment of a young doctor named Teshorn, who was practicing medicine at Troy. About three weeks ago he left for New Orleans to help in the yellow fever epidemic, and is now attending patients in a hospital in that city. A man who will thus risk his life for the benefit of his fellow-men, and for only \$10 a day, is worthy of honor.

—There have been several inquiries as to the trains running to Freeport during the State fair. For the information of such it is stated that a special train leaves Elkhorn every morning, arriving at Beloit at 7:10 a. m., and leaves Freeport on the return as to reach Beloit at 7:38 p. m., and reaches Clinton in time for the evening train coming north on the Northwestern road. It is a little strange that the time table could not have been arranged so as to connect with the morning train from this city, but it is too late now to be helped.

THE WEATHER.

The thermometer at 7 o'clock this morning stood at 67 degrees above and at 2 o'clock 81 degrees above. Clear. One year ago to-day at corresponding hours the thermometer stood at 51 and 62 degrees above.

The indications to-day are for the Tennessee and Ohio valleys, lake region, upper Mississippi and lower Missouri valleys, south and west winds, falling barometer, warmer, partly cloudy weather and light rains, possibly followed in the western portions by rising barometer and clearing weather.

DIAMOND DIST.

The Chicago were beaten by the Boston yesterday the score being 8 to 11. The Boston made the 3 winning tallies in the ninth inning.

The Providence club defeated the Forest City of Cleveland 5 to 0.

The Peoria Reds have started out on an

COLD-WATER MEETING.

The Aldermen again Turn Their Attention to Water Works.

Sundry Other Business of the Council.

The regular semi-monthly meeting of the Common Council was held at the City Hall last evening. His Honor, Mayor Norcross, in the chair, all the Aldermen being present.

The Journal was read by the Clerk.

On motion of Alderman McKinney, one motion made by Alderman Lawrence, was ordered stricken from the record, together with the "reason" portion of the Mayor's refusal to entertain an appeal. All this was relative to the appointment of Election Inspectors two weeks ago, and was done, not because the Journal was "incorrect," but to make the same harmonize with the ideas of the majority. The Mayor entered his protest. The Journal was then approved.

Ald. Davies presented a petition of residents of Washington and Bluff streets, asking that a lamp post be erected at the corner of Washington and Bluff streets. Referred to Gas Committee.

On motion of Ald. Davies, the City Attorney was instructed to discontinue the suits against Messrs. Fish and Barnes, for violation of the Fire Ordinance.

Ald. Davies presented the applications of O. E. Smith & Co., for the transfer of Jacob Rosenfield's license. Referred to the License Committee, who subsequently reported back favorable, and the transfer concurred in.

The quarterly report of the Chief Engineer of the Fire Department was presented and referred to the Fire Committee.

A communication was received from County Clerk Morgan, calling the attention of the Council to the law in relation to the selection of Jurors. Referred to Judiciary Committee.

The Clerk read a large number of miscellaneous bills. Referred to proper committees.

Mayor Norcross stated that he refused to sign the order allowing Ald. Fitzgibbon \$300, for services as engineer of Washington engine, citing the charter prohibition as his only reason.

Ald. Davies moved that the Mayor be directed to sign the order.

Ayes—Ald. Church, Davies, Fitzgibbon, Hemming, Hutchinson, Lawrence and McKinney—7.

Nayes—Ald. Joyce, Wilcox and Vankirk—3.

The Mayor declared the vote lost on the ground that it required a two-thirds vote, and that Ald. Fitzgibbon had no right to vote.

Ald. Fitzgibbon stated that he had taken counsel in the matter.

Ald. Church, from the Highway, Street and Bridge Committee, reported in favor of re-planking Milwaukee street bridge with two-inch plank, laid on top of the old ones. Deferred until next meeting.

Ald. McKinney read the following:

WHEREAS, There are large portions of our city situated so far from the river as to be difficult to reach, and in many cases, impossible to protect them from fire with our present fire apparatus, and

WHEREAS, The average annual cost of our fire department is about the sum of seven thousand five hundred dollars, which is levied upon all taxable property, whether within the reach of our engines or not, and

WHEREAS, It is believed that much better fire protection can be secured to all portions of our city by water works, at a cost not greater than the average annual cost of our present fire department. Therefore,

Ordered, By the Mayor and Common Council of the City of Janesville, that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

that the Mayor and City Clerk do cause to be laid out, at least one-half mile deep, of the following lines: Sixteen hundred feet of sixteen inch pipe; seven thousand feet of twelve inch pipe; nine thousand feet of ten inch pipe; twenty-three thousand seven hundred and sixty feet of eight inch pipe; twelve thousand feet of six inch pipe, and ten thousand feet of four inch pipe, with sixty double-faced water valves, and one hundred and twenty-five fire hydrants, at such points as shall be designated by the Common Council of said city, and

A HOUSEHOLD INVENTION.

M. Hanson & Co., have received and placed on exhibition in their furniture warehouse, a decidedly novel invention, which promises to be a taking one for household purposes. It is a portable wash-stand, finely finished and with a marble top and basin, and so arranged that no bowl or pitcher is needed, there being an instantaneous flow of water from a reservoir, which is hidden out of sight and out of the way, and the waste water is allowed to run off into another receptacle. It has all the advantages of stands furnished by pipes from water works with none of the disadvantages of sewer gases or plumber's bills, and is as portable as any ordinary stand or commode. Its advantages are many. There is no slopping of water over carpets, there is no breaking of bowls, pitchers or sloop jars, as none are required. At the Centennial exhibition it took a medal and diploma for "originality of principle combined with usefulness and convenience." There is nothing in anyway complicated about it, and its durability and usefulness, and beauty must recommend it to all who see it, or use it. The apparatus can be attached to stands of old patterns at less expense than wash-bowl, pitcher and sloop jar can be bought for. There are no pipes to freeze, and no water to empty from the bowl. In fact its many advantages can only be realized by putting it into practical use. It should be seen and examined by all in any way interested.

THE MILITARY.

The Janesville Guards last night turned out for their first parade. It was a good deal of an experiment as the boys had only been drilled in the armory where there was not the necessary latitude for extended marching or evolutions. The Guards last night on the street however made a fine show, there not being a single slip or a break. They were neatly uniformed and handled their shooting sticks like old troopers. As they neared the armory of the Janesville Veterans, the latter had just finished their business meeting, and were scattering for home. They heartily cheered the Guards, and showed a kindly courtesy to them.

At a meeting of the Janesville Veterans last evening the following were elected as non-commissioned officers:

Sergeants—John Andrews, C. E. Brown
